## MCAS Report 2012

 Cambridge Public Schools

Office of Student Achievement, Accountability and Curriculum

## TABLE OF CONTENTS

Executive Summary ..... 1
MCAS Progress over Time 2003-2011 ..... 4
Performance as Compared to State Targets
Aggregate and Student Subgroups
English Language Arts ..... 6
Mathematics ..... 7
Science ..... 8
Percent of Students at Advanced/ Proficient Levels on MCAS Grade Level ..... 9
Racial/Ethnic Subgroups ..... 10
NCLB Subgroups: Special Education, FLEP/LEP, Low Income ..... 11
Student Growth Percentiles
Grade Level ..... 13
ELA Growth by School ..... 14
Math Growth by School ..... 15
Student Growth by Race/Ethnicity ..... 16
Student Growth by Subgroup ..... 17
Accountability
Cambridge's Accountability Status ..... 18
2012 Accountability Status of CPS Schools ..... 19
Individual School Results ..... 20

## Executive Summary

Cambridge recognizes the MCAS assessment as an important indicator of student achievement. MCAS results are reviewed annually at the district, school and individual student levels as an indicator of how well students are performing on the state standards in English Language Arts (ELA), Mathematics and Science/Technology/Engineering. More recently, Massachusetts has added student growth as an additional measure of student progress.

In addition to reviewing annual MCAS student performance information, the district analyzes trends in data over time. Curriculum leaders use this information to insure that the curriculum is in alignment with state standards, realign curricula as needed, target areas for improvement, provide the appropriate professional development and support to administrators and staff, and assess progress.

At a school level, administrators use MCAS and other multiple data sources in working with their Instructional Leadership Teams and school communities to develop School Improvement Plans. The plans are developed through a process that parallels that of the district. Specific improvement strategies are identified and an action plan is developed to support the identified areas of focus for each school.

In the spring of 2012 a total of seventeen (17) MCAS assessments were administered. Students in grades 3-10 took up to three MCAS tests in English Language Arts (ELA), Mathematics and Science/Technology/Engineering. The results of the 2012 assessments as well as MCAS trends over time are included in this report. Results are reported both for the aggregate and for student subgroups.

## New reporting Categories in 2012

To aid in analyzing MCAS results and school accountability, the State Department of Elementary and Secondary Education (DESE) created a new category or composite subgroup of students in the 2010-2011 school year. The new high needs group is an unduplicated count of all students in a school or district belonging to at least one of the following individual subgroups: students with disabilities, English language learners (ELL) and former ELL students, or low income students (eligible for free/reduced price school lunch).

The subgroup that the DESE had previously called Limited English Proficient (LEP) has been changed to English Language Learners (ELL). The subgroup previously called FLEP or formerly limited English proficient is now called former ELL students (FELL).

## MCAS Highlights

## Overall Performance

In 2012 CPS performance in English Language Arts for all students tested in grades 3-10 remained relatively unchanged from the prior year (from 85.0 to 85.4 CPI points). This CPI represents a 10.5 point gain since 2003. State performance in ELA decreased from 87.2 in 2011 to 86.7 in 2012.

CPS performance in Mathematics increased from 77.8 to 79.6 CPI points. State performance remained unchanged from the prior 2 years at 79.9. Since 2003, the district's math CPI has increased by 20 points.

DESE began reporting an aggregate and subgroup CPI for Science in grades 5, 8, and 10 for all schools and districts in the state in 2012 (and retroactively included last year). In 2012, CPS performance in Science improved from 72.3 to 73.9 CPI points. State performance in Science improved from 77.6 in 2011 to 78.6 in 2012.

While the performance of Cambridge students continues to improve, there are still areas of concern, specifically around the achievement gap, which will also be addressed in this report.

## Percent of Students at Proficient/Advanced Performance Levels

## English Language Arts

There were improvements in the percent of students scoring in the proficient/ advanced categories at all grades with the exception of grades 5 and 8. Proficiency rates at grade 10 improved by another $6 \%$ in 2012 making for a two-year gain of $16 \%$. At CRLS/HSEP, the percentage of $10^{\text {th }}$ grade students who scored proficient or advanced was $89 \%$, higher than the state average for the first time. In $3^{\text {rd }}$ and $6^{\text {th }}$ grade, CPS ELA results ( $64 \%$ vs. $61 \%$ and $66 \%$ vs. $63 \%$ respectively) were also above the results of students statewide as well as the same as those of students statewide in grade 7 (71\%).

Grade 8 students had a fairly substantial decline in proficiency rates from previous years and scored $10 \%$ below the state average proficiency.

## Mathematics

There were improvements in the percent of students scoring in the proficient/ advanced categories at all grades with the exception of grades 4 and 8 . There was a $2 \%$ decrease in grade 4 and $1 \%$ decrease in grade 8 . Students in grade 10 increased their proficiency by $8 \%$ over the previous year. $83 \%$ of all CPS students (including students in special education outplacements) were proficient or advanced in comparison to only $78 \%$ of all students in the state. Students in grades 3 and 7 also outperformed their counterparts at the state.

## Science

The proficiency rates in Science increased at all grades in 2012. At grade 8 more students scored proficient and advanced this year in comparison with last year; however only $38 \%$ of CPS eighth grade students were proficient in Science (as compared with $43 \%$ statewide).

## Achievement Gap

In terms of proficiency (students performing at proficient and advanced levels), the performance of CPS White students has been consistently above the state for several years in both ELA and Math. The subgroups of LowIncome and African American students in Cambridge have performed at higher proficiency rates in Math than their counterparts across the state for the past two years. For the first time in 2012, students with special needs outperformed their counterparts across the state in Math. Cambridge ELL/FELL students, on the other hand, continue to perform at lower proficiency rates in comparison to their counterparts across the state in both ELA and Math. For students in the High Needs category, Cambridge had higher proficiency rates in both ELA and Math in
2012. Due to a reporting error, the state was unable to report the results of Hispanic students for CPS, but in previous years, CPS Hispanic students have outperformed their counterparts in the state.

Even with the higher proficiency rates in comparison to the state, achievement gaps persist between Low-Income and Non Low-Income students, students with special needs and general education students, and among different ethnic and racial subgroups, particularly African-American/ Black students. These proficiency gaps continue to challenge the Cambridge Public Schools and closing them remains one of the district's primary and most urgent goals.

Trends in the district performance and growth of both the aggregate and all subgroups are included in this report. Individual school reports that show each school's CPI over time for the aggregate and subgroups are included in the appendix of this document.

## Student Growth

The Massachusetts Department of Elementary and Secondary Education (DESE) has developed a growth model of student performance as a supplement to the MCAS results. This year, families received growth scores along with their child's MCAS performance level.

Student growth percentiles (SGP) are a measure of student progress that compares changes in a student's MCAS scores to changes in the MCAS scores of students across the state with similar performance profiles. This indicator helps families, teachers, and administrators know whether students are improving from year to year by comparing students to their "academic peers" or students with similar MCAS histories. A typical school or district would have a median student growth percentile of 50. Student growth percentile rankings in the range of 40 to 59 are considered average while SGPs above 60 indicate higher than average growth and below 40 indicate lower than average growth in comparison to all students in the state.

As a district, Cambridge had a median student growth percentile (SGP) of 52 in ELA and 58 in Math. In 2012, Math growth was at its highest level since the state began to provide this indicator in 2008, improving by 3 points over the prior year's median growth of 55. In ELA, there was a slight increase in growth from 51 to 52.

Three (3) schools had above average growth in ELA (Haggerty, Graham \& Parks, and Cambridgeport). Five (5) schools had above average growth in Math (CRLS/HSEP, Graham \& Parks, Morse, and Tobin).

Asian and White students had high average growth in ELA and above average growth in Math. African American/Black students had average growth in both ELA and Math. Students with special needs had high average growth in Math while all other subgroups (ELL/FELL, Low Income, and High Needs) had average growth in both ELA and Math.

## Accountability Status

The Massachusetts Department of Elementary and Secondary Education instituted a new Accountability \& Assistance Level system last year. Schools are assigned a level from 1-5 based on the four-year trend data, and districts are assigned the level of the district's lowest school (see page 18 for more detailed information).

Four (4) CPS schools have been designate Level 1 Schools - King, Morse, Haggerty, and Graham \& Parks. All other schools have been categorized as Level 2. Cambridge has also been designated a Level 2 District and it is the only Urban District in the state that is not in Level 3 or below. This means that none of our schools are among lowest performing and least-improved $20 \%$ of schools statewide.

## MCAS 2012

## Cambridge's Progress toward Proficiency

The Composite Performance Index, which the state continues to use in its new accountability system, is an indicator of performance improvement over time. Cambridge continues to improve on this measure.

## What is the CPI?

## The Composite Performance Index (CPI)

is a number that measures how well a school or district is progressing toward our MCAS proficiency gap goal. Students who score proficient or advanced are assigned 100 points, High Needs Improvement 75 points, Low Needs Improvement 50 points, High Warning 25 points and Low Warning 0 points. Students who take a MCAS Alternative Assessment are also awarded points based on their portfolio. The points are averaged resulting in a number between 0 and 100, the CPI.

CPI's are calculated separately for ELA, Mathematics and Science tests for all levels- state, district and school, both in the aggregate and for student subgroups. In 2012, the state began calculating science CPIs for the district combining grades 5, 8, and 10 science results for the new accountability system. They also retroactively calculated the science CPI for 2011. Going forward we will continue to track this.

In 2012 the district's performance in English Language Arts remained relatively unchanged from $\mathbf{8 5 . 0}$ to $\mathbf{8 5 . 4} \mathbf{C P I}$ points for all students tested in grades 3-10. State performance in ELA decreased from 87.2 to 86.7.

CPS performance in Mathematics increased from 77.8 to 79.5 CPI points. State performance remained unchanged from the prior 2 years at 79.9.

## English Language Arts - increase from 74.9 in 2003 to 85.4 in 2012

## Composite Performance Index 2003-2012

|  | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## Composite Performance Index 2003-2012

## Composite Performance Index 2011-2012

## Aggregate and Student Subgroups

## English Language Arts

In general, the average CPI in English Language Arts in 2012 remained relatively the same as 2011. The average CPI for Low Income, ELL and former ELL (FELL), White, and special needs students increased across the district. The CPI for African American/Black students dropped slightly to 76.9 as did the CPI for Asian students. Due to a data reporting error, there is currently no CPI for Hispanic students.

## Mathematics

The average CPI in Mathematics for all subgroups increased in 2012. Due to a data reporting error, there is currently no CPI for Hispanic students.

Science (Grades 5, 8, and 10)*

The average CPI in Science for all subgroups increased in 2012 with the exception of English Language Learners (ELL) and Former English Language Learners (FELL). Due to a data reporting error, there is currently no CPI for Hispanic students.

*Because of the new accountability system, the DESE began aggregating Science results and reporting the CPI for Aggregate and Subgroup Science results in 2011.

Charts that show the progress of each CPS school's CPI are included in the appendix of this document.

## \% of Students at Advanced and Proficient Levels 2009-2012

## English Language Arts

There were improvements in the percent of students scoring in the proficient/ advanced categories at all grades with the exception of grades 5 and 8 . Proficiency rates at grade 10 improved by another $6 \%$ in 2012 making for a two-year gain of $16 \%$. The percent of students who scored proficient/advanced at grade 8 decreased by $10 \%$ from the previous year.
Mathematics
There were improvements in the percent of students scoring in the proficient/ advanced categories at grades all grades with the exception of grades 4 and 8 . There was a $2 \%$ decrease in grade 4 and $1 \%$ decrease in grade
8 .Students in grade 10 increased their proficiency by $8 \%$ over the previous year. In grades 3,7 , and 10 , Cambridge students outperformed the state in Math.

## Science

The proficiency rates in Science increased at all grades in 2012. At grade 8 more students scored proficient and advanced this year in comparison with last year; however only $38 \%$ were proficient in Science.

MCAS 2012 - \% Proficient/Advanced in English Language Arts

|  | CPS |  |  |  |  | State |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## \% Proficient/Advanced by Racial/Ethnic Group

The following chart details the three year trends of students in the proficient/advanced categories by racial/ ethnic subgroup. Subgroups include the NCLB designations of African American/Black, Asian, Hispanic/Latino, and White. Native American and Multi-racial subgroups are not listed due to the small numbers. More detailed information is available at http://profiles.doe.mass.edu

| MCAS - \% Proficient/Advanced by Racial/Ethnic Group |  |  |  |  |  |  |  |

## MCAS 2012

## Student Growth Percentiles

A student growth percentile (SGP) measures student progress by comparing one student's progress to the progress of other students with similar MCAS performance histories (called "academic peers"). A percentile is used because its value expresses the percentage of cases that fall below a certain score.

The most appropriate measure for reporting growth is the median (the middle score if individual scores are ranked from highest to lowest). A typical school or district would have a median student growth percentile of 50. The state has advised using the band of $40^{\text {th }}-60^{\text {th }}$ percentile as typical or average growth .

In Cambridge, overall Math growth was high average at 58. Grades $8 \& 10$ Math had above average growth (60 or higher). Grades 4 \& 7 in Math and grades 5 \& 7 in English Langauge Arts had high average growth. All other grades showed typical growth in 2012.

|  | Cambridge Public Schools |  |  |  | State |  |  |  |

## Student Growth by School- ELA

The scatter plot below shows both the percent of students achieving proficiency and median student growth percentiles. In the plot below, the Haggerty School shows both high growth (67) and high proficiency (77\%) in English Language Arts. CRLS has high proficiency with average growth. The Graham \& Parks and the Cambridgeport both had above average growth.

|  | SGP | $\%$ <br> Prof/Adv |
| :--- | :---: | :---: |
| Amigos School | 55 | $70 \%$ |
| Cambridgeport | 66 | $69 \%$ |
| Fletcher/Maynard | 57 | $49 \%$ |
| Graham and Parks | 61 | $72 \%$ |
| Haggerty | 67 | $77 \%$ |
| John M Tobin | 47 | $46 \%$ |
| Kennedy-Longfellow | 47 | $55 \%$ |
| King Open | 51 | $62 \%$ |
| Maria L. Baldwin | 45 | $67 \%$ |
| Martin Luther King | 53 | $59 \%$ |
| Morse | 43 | $62 \%$ |
| Peabody | 53 | $73 \%$ |
| Cambridge Rindge \& Latin | 48 | $89 \%$ |
| District | 52 | $66 \%$ |

## Student Growth by School - Math

In Math, there is higher growth overall and a more scattered distribution when compared to English Language Arts. The Graham \& Parks, Morse, Tobin, CRLS and Fletcher/Maynard all have above average growth. CRLS had both above average growth and a high rate of proficiency.

|  | Student <br> growth | $\%$ <br> proficient |
| :--- | :---: | :---: |
| Amigos | 57 | $64 \%$ |
| Cambridgeport | 59 | $53 \%$ |
| Fletcher/Maynard | 60.5 | $39 \%$ |
| Graham \& Parks | 68 | $72 \%$ |
| Haggerty | 59 | $66 \%$ |
| Tobin | 66 | $51 \%$ |
| Kennedy-Longfellow | 43.5 | $38 \%$ |
| King Open | 54.5 | $54 \%$ |
| Baldwin | 42 | $57 \%$ |
| King | 50 | $45 \%$ |
| Morse | 65 | $55 \%$ |
| Peabody | 49.5 | $60 \%$ |
| CRLS | 71.5 | $87 \%$ |
| District | 58 | $58 \%$ |

## Student Growth by Race/Ethnicity

Both Asian and White students have higher growth and proficiency in ELA and Math. In both ELA and Math, African American/Black students have average growth, but lower proficiency.

|  | ELA |  | Math |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Median | \% Prof/Advanced | Median | \% Prof/Advanced |
| African American/Black | 50 | $49 \%$ | 55 | $38 \%$ |
| Asian | 59 | $77 \%$ | 61 | $77 \%$ |
| White | 54 | $80 \%$ | 61 | $75 \%$ |

## Student Growth by Subgroup

SPED students have low proficiency and average growth in ELA; in Math, this year they had high average growth. English Language Learners and former English Language Learners (ELL/FELL) show similar low proficiency rates, but also have slightly higher average growth in ELA.

|  | ELA |  | Math |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Median | \% Prof/Advanced | Median | \% Prof/Advanced |
| SPED | 49 | $30 \%$ | 59 | $24 \%$ |
| ELL/FELL | 52 | $26 \%$ | 53 | $32 \%$ |
| Low Income | 48 | $50 \%$ | 54 | $42 \%$ |
| High Needs | 49 | $50 \%$ | 52 | $40 \%$ |

## Cambridge's Accountability Status

In February of 2012 Massachusetts received a waiver from certain provisions of No Child Left Behind (NCLB), specifically the requirement that all students reach proficiency on MCAS in Mathematics and English Language Arts by 2014. Instead of expecting all schools to reach 100 percent proficiency by the year 2014, the state will measure progress toward the goal of reducing proficiency gaps by half by 2017.

This system is based on multiple achievement indicators measured over multiple years. The new performance measure, the Progress and Performance Index (PPI), incorporates student growth; achievement in science, as well as English language arts and math; the narrowing of proficiency gaps; dropout rates; and graduation rates.

The state's new Accountability \& Assistance Level system has five levels (see below). Schools are assigned a level from 1-5 based on the four-year trend measured by the cumulative PPI, and districts are assigned the level of the district's lowest school.

Four (4) CPS schools are Level 1 Schools - King, Morse, Haggerty, and Graham \& Parks. All other schools have been categorized as Level 2. Cambridge has also been designated a Level 2 District and it is the only Urban District in the state that is not in Level 3 or below. This means that none of our schools are among lowest performing and leastimproved $20 \%$ of schools statewide.

## Level 1 - Schools with an NCLB Accountability Status of No Status or Improvement (Year 1 or 2).

- Districts are placed in Level 1 if the highest Level of any school in the district is Level 1.

## Level 2 - Schools with an NCLB Accountability Status of Corrective Action or Restructuring.

- Districts are placed in Level 2 if the highest Level of any school in the district is Level 2.

Level 3 - Schools identified as among the lowest performing and least-improved 20 percent of schools statewide based on common grade levels, regardless of NCLB Accountability Status.

- Districts are placed in Level 3 if the highest Level of any school in the district is Level 3.

Level 4 - Schools identified as among the lowest performing and least-improved 20 percent of schools statewide based on common grade levels, regardless of NCLB Accountability Status, are eligible for placement in Level 4. Not more than 4 percent of schools may be in Levels $4 \& 5$ at one time. Placement is made by Commissioner.

- Districts are placed in Level 4 if the highest Level of any school in the district is Level 4 or if the district has been declared Underperforming by the Board of Elementary and Secondary Education, independent of its schools.

Level 5 - Level 4 schools declared by the Board of Elementary and Secondary Education as requiring "Joint ESE-District Governance".

- Districts are eligible for placement in Level 5 if they are among the lowest performing and least-improved 10 percent of districts statewide based on common grade levels, regardless of the Level of any school in the district.

## Progress of CPS Schools

Each school is issued an Accountability Status report annually that shows whether the school is has met their proficiency gap narrowing goals.

## 2012 Accountability Status of CPS Schools

The chart below gives detailed information about the accountability status of each school.

| SCHOOL |  | PPI | Met Target? | Accountability Status |
| :---: | :---: | :---: | :---: | :---: |
| Amigos | Aggregate | 87 | YES |  |
|  |  |  |  | Level 2 |
|  | High Needs | 73 | NO |  |
| Baldwin | Aggregate | 61 | NO |  |
|  |  |  |  | Level 2 |
|  | High Needs | 55 | NO |  |
| Cambridgeport | Aggregate | 65 | NO |  |
